

PHARMGRADE Stubble Buster 6-0-0

- ✓ Nitrogen(N)
- ✓ Humic Acid
- ✓ Fulvic Acid
- ✓ Microbes
- ✓ Mycorrhizae
- ✓ Organic Matter
- ✓ Carbon

Pharmgrade Stubble Buster is a nitrogen-enhanced microbial inoculum that is will digest stubble and other plant residue left behind after crop harvest.

Stubble Buster also contains high amounts of humic and fulvic acids as well as a high amount of microbes and mycorrhizae to enrich the soil in preparation for planting next season's crop.

*This blending process (also known as **Hybrid Fertilizer Technology™**) provides the necessary nutrients you need to enrich and build your soil and unlock nutrients found within.*

- 6-10 gallons per acre prior to fall tilling
- Excellent for digestion of all plant residue
- Over 200 strains of microbes
- Excellent reducing nutrient tie-up in the soil
- Mixes well with many fertilizers and chemicals
- Environmentally Friendly
