

# Phinisher

## PRODUCT INFORMATION

PHINISHER is a (PGPR) PLANT GROWTH PROMOTING RHIZOBACTERIA. PHINISHER contains potassium, micro nutrients, and organic acids that are proportioned and metabolized in a way as to promote the plant to fruit, produce seed and enhance cell elongation. PHINISHER is compatible with most fungicides. It is recommended that a jar test be made to determine compatibility.

## RECOMMENDED APPLICATION

Apply PHINISHER at 3-7gallons per acre. Contact a local Pharmgrade representative for more instructions. Goal Line is compatible with most sprinkler and drip irrigation. Always agitate before use to get any sediment back into solution. It is recommended to flush the system after each application to prevent possible sediment clogging.
